PowerPro T/A Control and Data Acquisition

From Total Automation to Complete Hands-on Control

PowerPro T/A offers Total Automation. Start your engine, reach oil temperature and then sweep, all with one click. Or take a more hands on approach, it is up to you. With precision control of throttle and load, you can automate break in's and warm up's. Engine mapping is a breeze. Power Pro T/A accepts up to 45 sensors. Look for new features in all PowerPro systems such as Sweep Tracer for live comparison graphs while your test is in progress.

Features

- Precise control over engine and dynamometer
- Step testing for engine mapping
- Automate test patterns from start to finish
- Sweep Tracer real time graphing
- Eight pressure channels with four transducers
- 15 general purpose 0-5V auxiliary analog inputs
- Two analog outputs
- 3 fuel flow inputs
- Second monitor and video card for split screen display
- Two days of training included

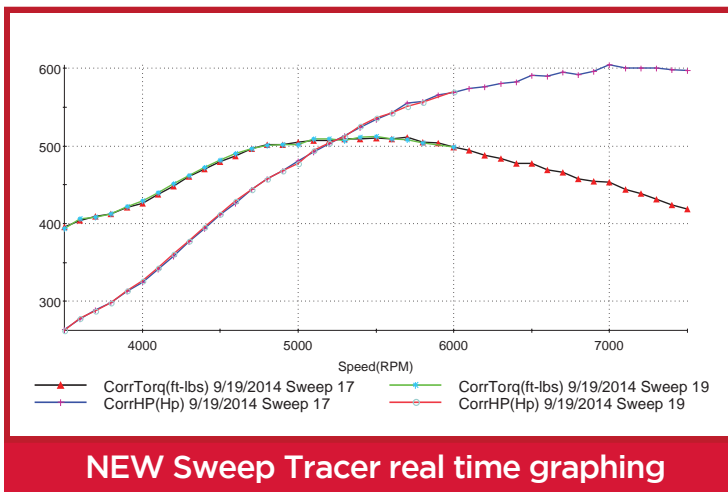

Expansion box

PowerPro T/A Allows You to...

- Control load and throttle precisely via software
- Create warm-up cycles
- Perform life cycle tests
- Write break-in patterns for flat tappet cams
- Step testing/fuel mapping
- Upgrade your existing system

Included Sensors

- Load Cell
- Speed Sensor
- 8 egt's (12 inputs)
- 3 temp (5 inputs)
- 1 fuel flow (3 inputs)
- 4 pressure sensors (8inputs)
